## Compilation and Execution

Piskovyi Vladyslav and Oleksandr Mysiura

**To compile and run the application, follow these steps :**

- **Connect the Board** to the Computer :
    - Ensure the MZ\_APO board is properly connected to your computer.
  - **Update Makefile** with Board IP :
    - Enter the correct IP address of your MZ\_APO board.
  - **Compile** and **Run** the Application :
    - Open a terminal in your project's root directory.
    - Run the command : *make run*
-
